

Nexus Federal Solutions LLC is a New Jersey small business that serves as prime contractor for federal facility-service requirements. Nexus provides the management layer (program management, scheduling, quality control, reporting and the single point of accountability to the Contracting Officer and COR) and teams with established, licensed local small businesses for field labor.

CORE COMPETENCIES

- **Program management:** work planning, schedules built around installation operations, staffing coordination and a single on-call point of contact for multi-building sites.
- **Quality control:** a written QC plan keyed to each contract's performance standards; scheduled and random inspections; a location-by-location log with before-and-after photos where permitted; prompt re-performance of deficient work.
- **Reporting & compliance:** schedules, submittals, SDS and product data, safety documentation and COR reports on contract timelines.
- **Access & safety:** advance base-access processing for crews and vehicles; work performed in line with OSHA requirements.
- **Service lines:** janitorial and custodial; grounds maintenance and snow response; gutter and downspout cleaning and repair; power washing; integrated pest management through NJ-licensed partners; specialty trades and facilities support.

DIFFERENTIATORS

- **Owner-led and accountable:** direct owner involvement in every contract, and fast responses.
- **Prime-level oversight, proven local labor:** Nexus manages the work and the customer relationship and teams with vetted small businesses with long local track records.
- **Set-aside compliance:** performance structured to meet FAR 52.219-14, Limitations on Subcontracting (50% for services; 75% for specialty trades, excluding materials).
- **Transparent:** a newly formed company. We say so plainly, and we back it with documented QC, frequent COR communication and established partners.

SERVICE AREA

New Jersey and the NY/PA tri-state region, including installations such as NWS Earle, Picatinny Arsenal, JB McGuire-Dix-Lakehurst and VA facilities.
